

ADNAN: What Serial Didn't Tell You

author:

2026-06

Synopsis

Hundreds of millions of people tuned into Serial season one back in 2014. Sarah Koenig told us all about the story of 18-year-old high school senior Hae Min Lee who disappeared on January 13th, 1999. Hae's body was later found in Leakin Park, and not too long after the discovery of her body, police zeroed in on their prime suspect: Adnan Syed. Sarah took us all through 12 episodes of "Did he or didn't he?" and many of us ended the season with more questions than answers. But did you know that Serial was just the beginning and there was so much that Sarah never covered? If you listened to Serial season one, you must listen to this single episode that sums up the top four points Serial didn't tell you, but you need to know before you decide whether or not you think Adnan is guilty. We won't be re-covering the Serial story - we jump in assuming you already know it. So, if you haven't listened yet, check out the first season of Serial.
