From the outside, Bee Iverson and her fiancé, Aidan Shepard, look like any other happy couple - but looks can be deceiving. Not long into their engagement, secrets seep out of her past, lies surround them, and unwelcome surprises leak into their lives, breaking down Bee's confidence not only in herself but in their relationship, too.

Secret: Bee is keeping a piece of her past from Aidan - for him.

Aidan knows Bee is a serial killer, preying on men as often as she can. In fact, their shared passion of such dark desires fuels their love for each other. Each stalks the cold, dark nights of Maine in search of their next victims - but separately. Aidan doesn't want to play as a pair, but afterward they celebrate every kill. Every time blood is shed, their relationship deepens.

Lie: Bee is like any other serial killer.

As her past starts to bleed into her present, sleep comes harder and harder and monsters lurk around every corner. Worse still: As suspicion builds around a missing person's case involving the murderous pair, Bee will have to either outwit the detective breathing down her neck...or come up with another way to secure her freedom.

Surprise: Freedom comes at a high price.

Bee is the last person you'd suspect to slit your throat, but she has lots of practice.
