In a starred review, *Publishers Weekly* calls Hugo winner Charles Stross's novel *Halting State* a "brilliantly conceived techno-crime thriller." The year is 2012, and China, India, and the United States are waging an infowar for economic domination. With innocent gamers mere pawns in the hands of electronic intelligence agencies, programmer Jack Reed is tasked with ferreting out the plot of those who would gladly trade global turmoil for personal gain.
