Kurt Taylor and his family have battled the living and the dead and now find themselves on the run, their home reduced to ashes. With unimaginable horror lying in wait around every corner, the onset of winter and the plunging temperatures only add more danger to their precarious existence. They decide to forge ahead and try to reach the protection of others who have hopefully survived the zombie apocalypse. If this fails, their only choice would be to try and reach an impregnable fortress, a sanctuary that has stood for a 1,000 years. Standing between them and salvation are the villages and cities of the damned, a path that will test their spirit and resilience unlike anything they have faced before. More companions are rescued from the jaws of death and join them in their perilous journey. Mysterious attacks befall the group and it becomes clear the dead aren't the only things that lurk in the darkness.

Tempers fray and personalities clash. The group starts to fracture and Kurt is forced to commit acts that cause him to question his own morality. Can they survive the horror of their new existence? Will they want to? The Hellspawn saga continues.
