Hola, my name is TÃ-o Beto I taught myself Spanish, French, and a bit of Japanese and Italian. Learning takes a love of the language, time, and a playful spirit. This book is about playing with words. Enjoy it as much as I enjoyed writing it. Tell these riddles and tongue twisters to anyone who will listen. The funnier, the sillier, the more animated, the better. Jump up and down or act them out. How can you forget that, in Spanish, a peanut has caca inside? Now, go ahead and learn some crazy, fun, and useful vocabulary.

By the way, even though it is super silly, this book follows proven learning strategies.

You will learn: memory devices and cognates (140 words), animals and related words (34 words), places you probably already know (53 words), culture art and history (21 words), things to never say not bad words (9 words), tongue twisters (12 twisters). And the final chapter is audio flashcards that reinforce the 257 plus vocabulary words.

This is by far the most fun you will ever have learning Spanish. Do it!

Come along for a linguistic and cultural voyage with me.
