The Bed Sheet Serial Killer begins with FBI Agent Rick Clark and his forensic psychologist sidekick, Marty Robin, investigating a number of brutal serial murders committed within a three-year-period. All of the victims are women, and though they share few physical traits, their backgrounds are similar in one important way. One important way, that is, in the twisted brain of the serial killer. While Rick and Marty speculate on personal events that may have created this moral monster, the listener becomes, if not sympathetic to the perp, at least more understanding of the role the past plays in creating a cold-blooded killer on a mission to save lost souls.
