When her defiant behavior gets her in trouble with the law one too many times, 19-year-old Melanie Smith is sentenced to an experimental program for young women in need of particularly stern, humiliating forms of correction. Before she knows it, Melanie finds herself connected to a computer network and then waking up in a virtual world which feels as real as anything she has ever experienced.

Within moments of her arrival, a handsome doctor has stripped her bare, and given her an intimate, shameful examination, and then paddled her bottom thoroughly. The doctor's firm-handed dominance leaves Melanie helplessly aroused, and when he takes her in his arms and masters her completely it is better than anything she would have thought possible.

Melanie quickly discovers that the program has quite a bit more than just an embarrassing medical exam in store for her, and before her ordeal is over she will have been punished and claimed in more ways than she can imagine. But when her treatment is complete, will she end up longing for a dominant man to make her his own back in the real world?
